Ever wonder how many international students are in Canada, and where they come from? Well, we have some data available, courtesy of the Federal Government. Let's take a look at this troubling pattern.

The replacement agenda (a.k.a. the Kalergi Plan) is alive and well. And flooding the country with students from abroad is just one way to help implement it. Colleges and universities get much needed cash, and students get access to life in the West.

One thing to note: it appears that the data from these tables, page 44, refers to the TOTAL number of international students within Canada. This is not the same as the number of visas issued annually.

INTERNATIONAL STUDENTS IN CANADA: 2004

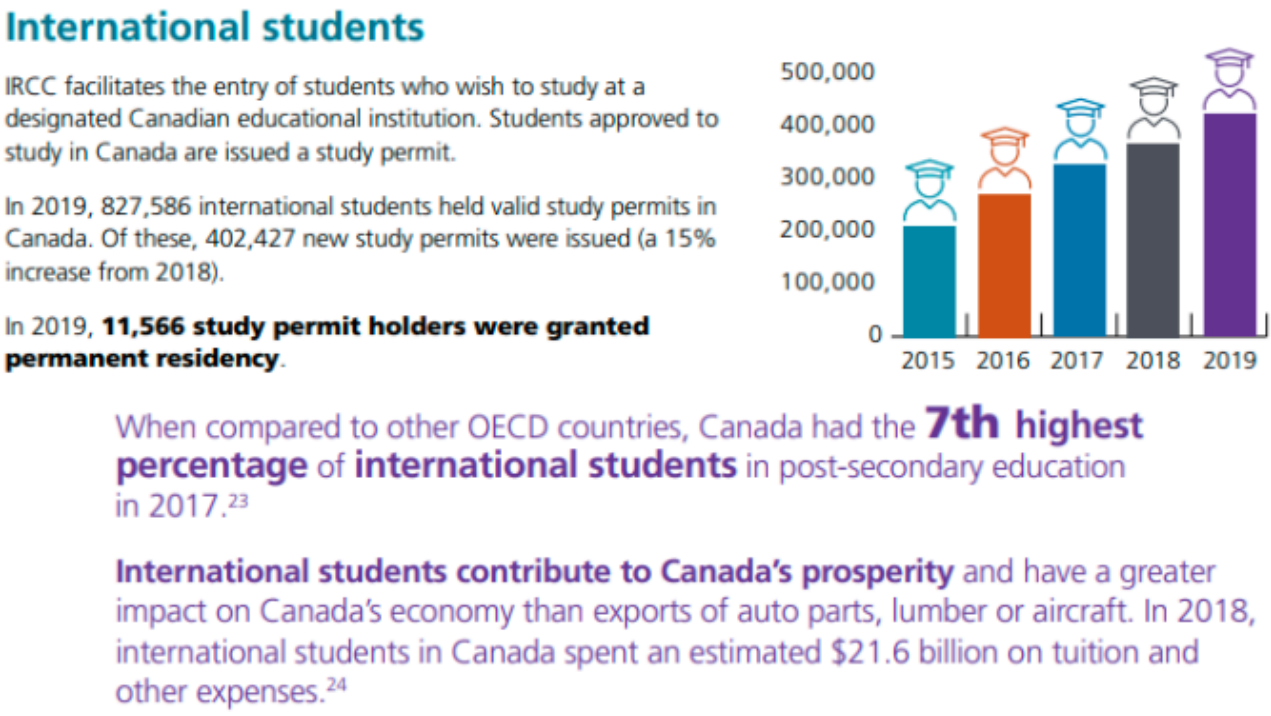
Again, this refers to the total number of students in the country, not the amount of visas issued in any given year. Needless to say, those numbers continue to climb as well. Note: page 48 of the same document gives even higher totals for the same years.



International students
IRCC facilitates the entry of students who wish to study at a designated Canadian educational institution. Students approved to study in Canada are issued a study permit.
In 2019, 827,586 international students held valid study permits in Canada. Of these, 402,427 new study permits were issued (a 15% increase from 2018).
In 2019, 11,566 study permit holders were granted permanent residency.

2015
2016
2017
2018
2019
When compared to other OECD countries, Canada had the 7th highest percentage of international students in post-secondary education in 2017.[23]
International students contribute to Canada's prosperity and have a greater impact on Canada's economy than exports of auto parts, lumber or aircraft. In 2018, international students in Canada spent an estimated $21.6 billion on tuition and other expenses.[24]

For a reference point, consider page 15 of the 2020 Canada Annual Immigration Report to Parliament. It was reported that:

> “In 2019, 827,586 international students held valid study permits in Canada. Of these, 402,427 new study permits were issued (a 15% increase from 2018).”

This means that the number of foreign students has nearly tripled from 2013 to 2019/2020. This is a major source of people entering the country.

Keep in mind, there are many, MANY pathways for international students to stay longer, or transition into permanent residents. The probable reason for not being open about this is to minimize the backlash from the already high immigration rates.

A little self promotion: Borderless Canada is still available online. Learn about what’s been going on in this country. Virtually all major issues can be directly tied to immigration and border security, and it’s not racist or bigoted to discuss these hard truths.
